

## *Simply Right* Feedlot Base Mixes

### Benefits of GainMor

- Low inclusion rates to provide optimum performance at an economical value
- The calcium to phosphorous ratio is formulated to enhance low grain, high roughage diet
- Supplemental protein for proper ration balancing that includes both natural and NPN sources

### Benefits of Maxi-Gain

- The calcium to phosphorous ratio is formulated to enhance a high grain or co-product based diet
- Designed for rations with 10% or more of corn co-products
- Available with Zinpo Performance Trace Minerals

### Feeding Rates

- When fed as part of a thoroughly mixed grain ration
- .25lbs to .40lbs per head per day

## *The Approach of Simply Right Minerals*

Suthers *Simply Right* feedlot base mixes are formulated to balance the nutritional profile of the grow/finish rations being fed today. **MaxiGain** is designed to be fed in rations containing 10% or more of corn co-products (dry matter basis); whereas **GainMor** is formulated to meet the needs of most other feedlot rations. Both lines provide similar trace mineral and vitamin supplementation, with the major difference in the phosphorus and potassium levels. The formulations are designed to be cost effective and to contribute to the stewardship of the environment.

# Feedlot Nutrition

## **MaxiGain and GainMor Customized cattle feeding programs**

Development of a properly formulated nutritional program is an essential part of cattle feeding. Cattle owners and feedlot managers consistently strive to balance cattle performance and cost of gain. Suther's distinguishes itself as a nutrition supplier by formulating customized cattle feeding programs. These programs balance a producer's feedstuffs, feed ingredient costs, and performance objectives to optimize cost of gain and profit potential. *Simply Right* feedlot base mixes **MaxGain** and **GainMor** are available with supplemental protein and the following feed additives: Rumensin<sup>®</sup>, Bovatec<sup>®</sup>, Gainpro<sup>®</sup>, and CoMax<sup>®</sup>.

### **Customized cattle feeding programs:**

- *Onsite and on-staff nutrition experts*
- *Farm specific ration formulation services*
- *Complimentary analysis of feed ingredients*
- *Ingredient procurement of feed co-products*

## ***Simply Right* Feedlot Base Mixes:**

- *Right for your cattle*
  - *Right for your feedlot*
    - *Right for your pocket book*
      - *Right for the environment*
