

PRODUCT DESCRIPTION

Suthers Solutions QC is a proprietary blend of Tannins, Saponins and Essential Oils developed to take advantage of the natural defense mechanisms plants. QC serves as a natural growth promoter while also improving nutrient utilization.

Suthers Solutions LS201 is available in 55-lb bags manufactured at Suthers facility in Frankfort, Kansas.

QC works in several areas

- Rumen population modulation, effects population of bacteria involved in fiber, amylase, urea, and methane driving the population to more efficient species and strains.
- Protein and starch utilization – forms rumen insoluble complexes that are degraded in the lower gut. This serves to slow the rate of digestion and move more digestion to the lower gut.
- Naturally effective against most internal parasites – Coccidiosis, Cryptosporidium, Worms without resistance
- Natural Antibiotic and Antiviral properties but spares probiotic bacteria
- Methane reduction decreases green house gas emissions but also retains more energy for the animal
- Decreases Urinary N shifting N excretion to fecal N. Energy saving for the animal.
- Antioxidant and anti-inflammatory properties

QC, is 100% natural, acts in the rumen

- Consistent results in protein efficiency
- Good response in performance
- Good strategy to replace or compliment other feed additives
- Can help to reduce feed costs
- A way to improve feed efficiency
- Can help to prevent rumen acidosis
- Effective to prevent diarrhea in young calves
